## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20 and 39, drawn to system for automatic optimizing and rapid booking of reservations, classified in class 705, subclass 5.
- II. Claims 21-31 and 36-38, drawn to method for constantly providing instant service reservation upon user demand regardless of location, classified in class 705, subclass 5.
- III. Claims 32-34, drawn to accessible electronic memory for storing, accessing and deleting rapidly changing data by an application program being executed on a data processing sub-system, classified in class 707, subclass 102.
- IV. Claim 35, drawn to a computer data signal embodied in a transmission medium comprising a registration source code, classified in class 717, subclass 122.

The inventions are distinct, each from the other because of the following reasons:

Inventions I through VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as automatic optimizing and rapid booking of reservations. Invention II has separate utility such as constantly providing instant service reservation upon user demand. Invention III has separate utility such as accessible electronic memory for storing, accessing and deleting rapidly changing data by an application program being executed on a data processing sub-system. Invention VI has separate

utility such as a computer data signal embodied in a transmission medium comprising a registration source code. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for each group is not required for the other groups, and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
